WALL MASTERS

www.texamhome.com

“We have a vision,
we design, we craft.
We believe in the power
of giving voice to a blank
and silent wall, as Wall Masters.”

The purpose of this brochure is to create a collection with all our digitally printed wallcoverings. What makes us unique is the use of different supports created ad hoc for our digital machines, produced here in the company directly by us; each collection is special in its kind. It has been a long process of research and experimentation, which has paid off to date with an excellent result.

Inside the brochure you can find the 4 different collections: **Ambient, Kata, Raw and ID.**

Our different supports are:

- **Ambient:** it is made on a nonwoven base, embellished with a relief print that simulates a moiré effect fabric.

- **Kata:** it was made on a non-woven base, enriched by a subtle metallic print that simulates the creasing of Japanese Kimonos, which inspired the collection.

- **Raw:** it is produced on a TNT base coupled with a pure cotton fabric that gives the entire collection a natural and ecological look.

- **ID:** it is the latest collection, which contains these three techniques, adding an additional support made of real quartz

Each of our supports is created with products of natural origin, this is because our philosophy is to create products that are inspired by nature and that at the same time respect it.

The purpose of this collections is also to satisfy different styles and trends, so as to meet everyone's taste.

Our wall coverings have abandoned the role of simple wallpaper, to become a refined interior embellishment, which reflects the emotions and style of those who choose them.

Collection
AMBIENT

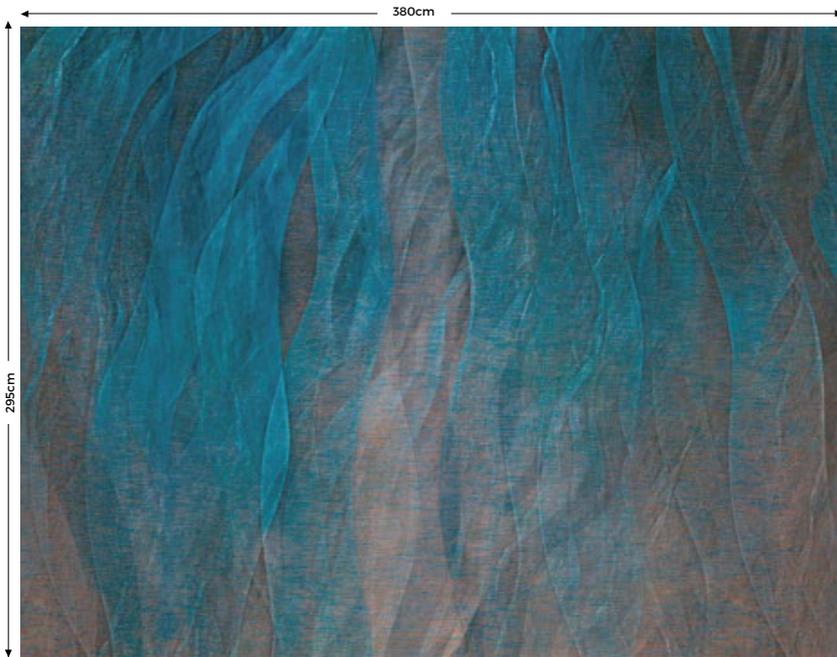

Ambient wallcoverings will enchant you with their patterns for the incredible ability to reveal the natural textures and charm of the ancient fabrics, which inspire the whole collection.

A poetic collection in which soft colors and refined designs intertwine, showing a silent elegance that gives warmth to any environment. The digital designs are 6 and they are all characterised by sinuous lines and colors that satisfy any need. Fabrics that fold on themselves, games of lights and shadows, infinite shades of colors, refined transparencies are just some of the characteristics of Ambient's unique designs.

Collection
KATA

The ancient Japanese art of kimonos tailoring is the point of origin of the Kata collection, to which pays tribute using quality materials and detailed avant-garde workmanship.

Forests in autumn, snowstorms, intimate atmospheres, strong lines and fascinating landscapes are some of the protagonists of the collection, made on a fine and elegant texture that simulates the fascinating fabrics of kimonos. The Kata wallcovering is embellished even more using metals in the printing, which puts a sheen on the end product.

Collection
RAW

The Raw collection is inspired by natural fabrics and is made with original and extremely sophisticated techniques.

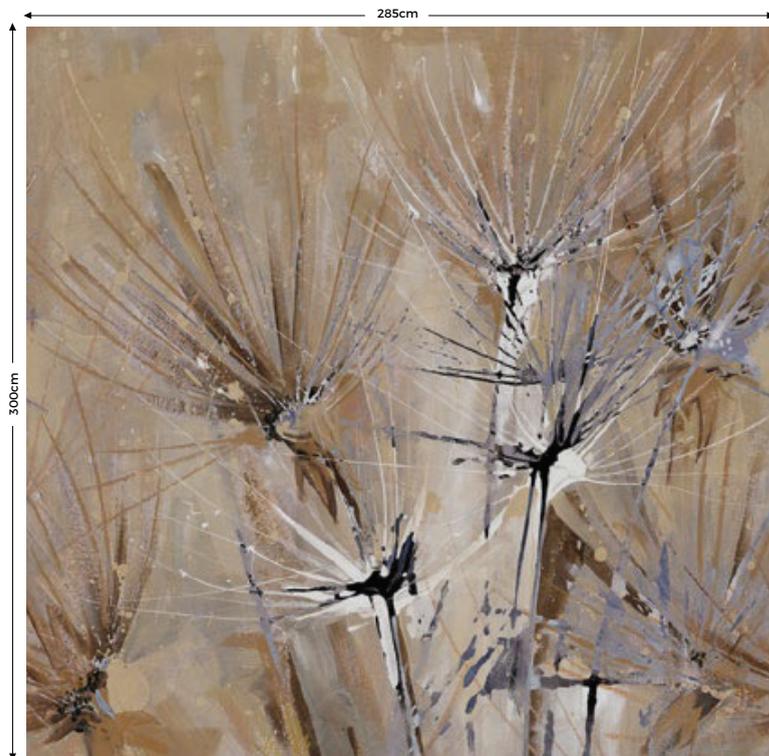

Raw wallcoverings are digital reproductions of real works of art printed on a cotton fabric coupled with paper, to simulate even more a real hand painted picture. All the designs are made by simple lines and splashes of color that give movement to the drawings.

The colors of natural fibers, such as hemp, linen and jute are mixed with new and trendy colors to offer an unique style.

Collection **ID**

ID as IDENTITY.

This versatile collection is at the service of the identity of each of us, so that we can feel represented by it in our environment.

Some patterns adapt to a more modern style with bold colors, others satisfy more a refined and minimalistic style.

One of the main features of the ID collection is the use of several bases made of different materials and finishes, 4 in total: quartz in relief, on cotton canvas, metallic prints and soft textures, all on a non-woven backing.

ID can satisfy everyone's taste, creating unique and refined atmospheres

Digital print on non-woven backing

Weight:

≈183 g/m² (± 5%)

Thickness:

50 µm

Straight match

Panel size:

95 cm x 300 cm / 37,4" x 118,11" (± 3%)

Number of panels:

FULL SET - 3 PANELS

Image size:

285 cm x 300 cm / 112,2" x 118,11" (± 3%)

Technical features:

Fire resistant - Shock-proof - Washable - Big dimensions

Sales unit:

the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million, and the number of people in the public sector who are employed in health care has increased from 2.5 million to 3.5 million (Department of Health 2000).

There are a number of reasons for the increase in the number of people employed in the public sector. One reason is that the public sector has become a more important part of the economy. Another reason is that the public sector has become a more attractive place to work. A third reason is that the public sector has become a more important part of the welfare state.

The increase in the number of people employed in the public sector has led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more competitive. A third change is that the public sector has become more customer-oriented.

The changes in the way that the public sector is organized have led to a number of challenges for the public sector. One challenge is that the public sector has become more complex. Another challenge is that the public sector has become more expensive. A third challenge is that the public sector has become more difficult to manage.

The challenges facing the public sector have led to a number of reforms. One reform is that the public sector has been reorganized. Another reform is that the public sector has been privatized. A third reform is that the public sector has been restructured.

The reforms have led to a number of changes in the way that the public sector is organized. One change is that the public sector has become more decentralized. Another change is that the public sector has become more competitive. A third change is that the public sector has become more customer-oriented.
